

Supporting the Implementation of the  
European Industrial Deal with Strengthened  
Social Dialogue in European Metal Sector.

# 3RD NEWSLETTER

## CONCLUSION OF THE RESEARCH PHASE

**Subject: SoDi Project: Research Results and National Reports Now Available**

## FROM RESEARCH TO EUROPEAN ACTION

After months of intensive work across the five partner countries – Poland, Bulgaria, Serbia, North Macedonia, and France – the SoDi Project (Supporting the Implementation of the European Industrial Deal with Strengthened Social Dialogue in the European Metal Sector), co-funded by the European Union, has successfully completed its research phase.

Thanks to the joint efforts of national and international experts, the National Reports and the European Summative Report have been finalised and are now available on the project website. These documents provide an in-depth overview of the challenges and opportunities of social dialogue in the European metal sector, highlighting training needs, good practices, and strategic recommendations to support a just, digital, and green transition within the framework of the European Industrial Deal.

## FROM LOCAL INSIGHTS TO A EUROPEAN VISION

The National Reports underline the key role of social dialogue in ensuring quality employment, fair working conditions, and workplace safety.

The European Summative Report consolidates and compares the findings from all partner countries, offering evidence-based recommendations for policy-makers, trade unions, and employers' associations.
